(a) Experimental axes
VLA / WAM model
ABot-M0 / LingBot-VLA 2.0
OpenWAM / LiLa-WAM
×
Backbone configuration
VLM / video / vision priors
Model-specific scales + adapters
×
Benchmark
RoboTwin / LIBERO / RoboCasa
CALVIN / LIBERO-plus
(b) Reproduction workflow
Align interfaces
Data + action semantics
Reference recipe
Train and monitor
Costs + throughput
Loss convergence
Closed-loop rollout
Fixed task protocol
Success + failures
Audit outcomes
Check denominators
Trace source records
(c) Release artifacts
Model package
Weights + matching configuration
Normalization + versions
Training record
Memory + GPU-hours + throughput
Raw losses + convergence
Evaluation record
Task counts + rollout settings
Failure analysis + audit
